Questions and Answers

1. What is meant by the 15 Days of 1st Creation?

- The next Gestation Cycle after the SEda Cycle is the one in which the Rasha Body Structure is born, *simultaneously* with the Tauren Cycle (1st Day) which eventually births the Diad (2nd Day).
- The first 9 Structures of the Inner Light Body, each formed after a Takeyon Cycle, are counted as 9 Days—The Starborn Cycle. *Simultaneously* 6 Outer Light Body Structures birth, counted as 6 Days. Together these are the 15 Days of 1st Creation.
- Inner Light Body Structures:

Outer Light Body Structures:	
Day 1: The Tauren	births with: The YunasA (Rosetta Sun) on Day 9
Day 2: The Diad	births with: The Eukatharaista Body on Day 10
Day 3: The Miad	births with: The 4 Eckasha-A on Day 11
Day 4: The Monad	births with: The 24 Eckashas on Day 12
Day 5: The AmOrA Hub Cell	births with: The Ecka-Vecas on Day 13
Day 6: The Adon	births with: The E-Luman-yana on Day 14
Day 7: The Edon	births with: The ELuman-aeri on Day 15
Day 8: The Aton (Rashallah)	

2. What are the Harmonic Key Cycles, or, what is the Takeyon Cycle?

- After the Tauren is born at the center of the ELum-Eiradhona it goes through a Takeyon Cycle, which is a Pulse Phase Cycle with 12 Harmonic Key Cycles where sparks are made along the Allurean Lines to build enough quantum to hit the Takeyon Flash Point. After 12 Takeyon Cycles the critical mass is reached—all the quantum comes together, pulls through as the Backflow through the Creation Point, and then gets a Backflow Return that is an increase of quantum plus the original quantum itself.
The 1st Flash Point is where the Tauren goes in to replicate its quantum. The Tauren comes back out as itself, but also has the Diad with it that has 6 Partiki.
- Harmonic Key Generation: a spark quantum building and replication Cycle.
- Harmonic Key Assembly: Sparks assemble in groups to form 12 Harmonic Keys—Base Tone Keys with EirA energy and Overtone Keys with ManA energy.
- Key Resolution: By resolving the difference of their quantum, Keys form Prana.
- Key Ordenation: Every 3rd Harmonic Key Cycle in a Takeyon Cycle (12 Harmonic Key Cycles) phases to build more quantum.

3. Why do the Ring and Span Tones activate not only our Rasha Body but also our Light Body and Physical Manifest Body?

- The structure of the PartikE of the Tauren is based on the larger structure of the ELum-Eiradhona with the huge 15 Geleziac Layers. The Rasha Body Dark Matter Template came from this structure of the PartikE and has the same 15 layers as the Light Body Base Shield structures. So when you are activating your Rasha Body with the Ring and Span Tones, you are activating the other as well.
- The Span Tones activate the bands in between, and the Ring Tones go with the Geleziac Radiation Levels. It brings the entire Rasha structure and Spiritual Body connection faster into the Matter structures.

4. Where do the Ethos and Eiros Grids come from?

- The Ethos and Eiros Grids that we phase in the Pillar of Power are part of the structure of the 4 Vecas plus the 2 (Ecka) E-Luman-yana Density Spirit Bodies.
- These Ethos-Eiros E-Luman-yana Density Spirit Bodies are behind the Radial Bodies called E-Luman-ata that we were activating with the Flame Body Activation Techniques.

5. What are the E-Luman-aeri (Density Time Vector Spirit Bodies)?

- In each Density E-Luman-yana and Radial Body E-Luman-ata you have 12 -Cell Probability Clusters: E-Luman-aeri Density Time Vector Spirit Bodies.
- Different probabilities come from the same main events.
- You have different probabilities depending on your Base Pulse Rhythm. You can end up seeing that probability as your manifest reality field rather than others.
- Technically you have a Probable Self in every one of the 12 Probabilities.
- The process of bringing yourself together is accreting all of the 12 different frequencies. First you bring in the lowest frequencies that run the Number 1 Allurean Chamber and then you experience the Number 2 Probability, then the Number 3 Probability, until you pulled yourself all together and get back to the middle Probability and then do another Cycle of them.
- In each Eckka-Veca, Eckasha, Eckasha-A and Eckasha-Aah are sets of 12 of these.

6. How are the 2 Krystal Spirals formed and what happens when they merge?

- After the Aton Cluster of 20,736 Partiki is born and before the YunasA is born, all the Inner Light Cells (the Tauren, Diad, Miad, Monad, AmOrA Hub Cell, Adon, Edon and Aton) that grow before, start opening their Spark Currents. These currents birth a Krystal Spiral. This happens on both the AdorA and EtorA sides.
- Both Krystal Spirals birth and meet each other on the Zero Point Axis (see Schedule with 8 Axes). They merge and then the Flame Shift Cycle occurs.
- The Inner Flame and Core Flame are formed within the Seed Atom of the Inner Domain—the Yunasai. (See Flame Images.)
- The Aton Activation and Akashic Record Imprinting also occur during this period (between Days 8 and 9).

7. What is the Aton Activation and Akashic Record Imprinting?

- During the Flame Shift Cycle, the Krystal Spiral Inner Light Body Currents eventually merge their EtorA and AdorA Elemental Adjugate Twin Spark Currents. This activates not only the Inner and Core Flames but also the 20,736 Partiki Cells of the Aton.
- There is a whole process in which everything that was created so far, the Aton included, pulls in to the Hall of Records 8-Cell Cluster.
- Through activation of the Flame Cycle and bringing together these currents from the AdorA and the EtorA side, the encryption of that entire particular part of the Rasha Body and Light Body of that Creation Cycle is imprinted into the Spirit Body in the Akashic and Ecoushic Records of the 1st Cell, literally recording it and putting it in a permanent record.

8. What is the relationship between the Cosmic YunasA and the Domains?

- On Day 9 the Cosmic YunasA 30-Cell Cluster births after a Flame Cycle, *simultaneously* with the birth of the ELum-Eiradhona and the Tauren on Day 1, after the first SEda Cycle.
- Before the Birth of the YunasA, the NavE-Na Cycles (Day 6 and Day 7) and the SEda Cycles (Day 8) of the smaller Domains started.
- The Spirit Domain Bodies phase into the HaRA Krysta Body, pull in through the DhaLA-LUma Doorway, and then birth out with the Cosmic Yunasun Cluster (the Cosmic YunasA or Rosetta Sun).
- This Cosmic YunasA creates all of the Seed Atoms for the Inner, the Middle, the Outer Domains and also the Adashi Domains.
- The Light Body and the Spirit Body of those smaller Domains fill themselves out, each creating a Eukatharaista Structure with its Spirit Body.

9. What has the YunasA to do with the Rosetta Flows?

- The Cosmic YunasA 30-Cell Light Body Elemental Command Cluster, also called the Rosetta Sun, births with the Inner Light Body Rosetta Cluster.
- The 9 layers of the Rosetta Cluster are formed from those different sets of Cell Structures that birth on the first 9 Days of Creation. (From the Tauren, the Diad, the Miad, the Monad, the AmOrA Hub Cell, the Adon, the Edon to the Aton.)
- They form the Rosetta Core Currents (the AdorA and EtorA Krystal Spirals).
- The Rosetta Flows open the Akashic and Ecoushic Record 1st Cells.
- The Rosetta Flows draw the 144 manifest Elemental Adjugate Twins into the 12 Allurean Chambers of the Cosmic Spirit Body. By opening these 12 Cosmic ELum-Eiradhona Currents into the Cosmic and Domain Allurean Chambers, the Core LaVa and Rosetta Flows merge with the Spirit Body Currents.
- In the LUma Eterna level of the Spirit Body, the Elemental Adjugate Twins open the NaVA-Ho Core Flows, which are shaped like “8s.”
- These NaVA-Ho Core Flows run between the LUma Eterna, the Hall of Records 8-Cells, the Akashic, Ecoushic Record 1st Cells, the Rasha Dark Matter Body, and the Inner and Outer Light Bodies.

- The Rosetta Flows also form the 9 Kundalini Flows when entering the Allurean Chambers of the smaller Domain Spirit Bodies.

10. Why are the HaRA Krysta Lines important?

- When the currents of the YunasA open up, they form the HaRA Lines. The Rosetta Flows open into the Allurean Chambers Cosmic and Domain Levels, creating the Core LaVa Flows and the 9 Rosetta Currents combined, to form the Core Cosmic HaRA Krysta Lines in the Domains and Cosmic Allurean Chambers.
- There are 12 HaRA Krysta Lines, which run the Allurean Chambers. They open into the whole structure of the Akashic Record and the Ecoushic Record and the Halls, right into the Creation Point and the Spirit Body.
- The 12 HaRA Krysta Lines directly link the Light Body through the Rasha Body through the Spirit Body so the flows can begin. They put everything on line with the Cosmic Time Matrix and the Living Body of God-Source.

11. What are “Foils” and how are they created?

- The Elemental Current fission and fusion begins at the core of the Cosmic Rasha Prana Seed, forming the 144 Base Elemental Currents of Eiradonis Atomic Matter and releasing the Atomic-Eiradonis Currents into the Light Body for Matter accretion.
- Atomic Elemental Currents are Eiradonis Adjugate Spirit Currents that form the Base Accretion Templates of Matter forms—the Eiradonis Templates or Foils.
- Light Body Spark Currents accrete upon, and form a crystalline membrane over, the Atomic-Eiradonis Armature Foil.
- Underneath the Light Body is this living Eiradonis level that is considered the core of the Atomic level.

12. What are the Axi-A-Tonal Lines and Meridian Lines supposed to run?

- In the manifest natural EtorA System, Axi-A-Tonal Lines are supposed to run the Akashic Currents, which are the EtorA Matter Eiradonis Currents flowing from the Allurean Chambers and Akashic Record AdorA 1st Cell. The substance is referred to as Hydrolase.
- These Akashic Currents form the Akashic Body EtorA Matter Foil natural Meridian Lines.
- These Meridian Lines are positive lines running EtorA Light Body Currents (Rosetta Currents) from the Allurean Chambers and the YunasA Rosetta Cluster.
- These EtorA Light Body Currents (Rosetta Currents) form the EtorA crystallized light-skin membrane over the Akashic Body Eiradonis Geleziac Foil.

Vocabulary

1. Creation Cycle:

The Creation process starts from the first Partiki and includes the NaVE-Na Cycle (Fertilization), the SEda Cycle (Birth of the ELum-Eiradhona), the Lightborn Cycle (Birth of the Tauren), the Starborn Cycle (Birth of the Rosetta + Seed Atom), the Life Born Cycle (Birth of the Rasha), and the God Born Cycle (Birth of the 7 Inner Suns Hub + the Outer Eukatharaista Body). All the stages are shown on a schedule with 8 axes.

2. Prana Joule:

The Prana Joule is the part of the Overtone ManA Key that is taken away to bond with the Base Tone EirA Key during the Key Resolution process.

3. Mana:

After Key Resolution, the part of the Overtone ManA Key that remains after the same amount of the Base Tone EirA Key has been subtracted is called Mana.

4. NaVE-Na Cycle:

Before the SEda Cycle there is first the NaVA-na Cycle with the birth of Partiki 1, then the NuVA-Na Cycle with the birth of Partiki 2. Together these are called the NaVE-Na Cycle.

5. Adjugate Twins:

During the Flame Shift Cycle, the Krystal Spiral Inner Light Body Currents eventually merge their EtorA and AdorA Elemental Adjugate Twin Spark Currents. Adjugate Twins are associated with each of the Allurean Chambers. Where an Allurean Chamber crosses through a Span, it creates a specific type of Element Encryption. These Chambers function as cross-vectors where the two different (EtorA and AdorA) Elemental Currents combine to form the transient element Celestalline.

6. Natural Periodic Table:

The Natural Periodic Table is associated with the 12 Allurean Chambers. They are actually responsible for making a specific encryption for specific elements that have to do with Adjugate Twins. Bringing the Adjugate Currents together is bringing Elemental Currents together from the AdorA and EtorA side. Every combination of these Adjugate Currents forms Celestalline, a transient element.

7. Kundalini Flows:

The Rosetta Flows form the 9 Kundalini Flows, which enter the Allurean Chambers of the smaller Domain Spirit Bodies.

8. Akashic Currents:

The EtorA Matter Eiradonis Currents are called the Akashic Currents and flow into EtorA Matter from the Akashic Record AdorA 1st Cell. The substance is referred to as Hydrolase.

9. Ecoushic Currents:

The AdorA Matter Eiradonis Currents are called the Ecoushic Currents and flow into AdorA Matter from the Ecoushic Record EtorA 1st Cell. The substance is referred to as Hydrolase.

10. Hydrolase Currents:

The Eiradonis Atomic Adjugate Spirit Currents are Hydrolase Currents. The substance is referred to as Hydrolase. It is part EirA and part Prana.

11. HaRA Krysta Line:

The currents coming from the YunasA open up the Hara Lines. These 12 HaRA Krysta Lines, which run the Allurean Chambers, open into the whole structure of the Akashic Record and the Ecoushic Record and the Halls, right into the Creation Point and the Spirit Body. They link the Light Body through the Rasha Body through the Spirit Body, so the flows can begin.

12. The Reuzhetta “Starlight” Code:

The Reuzhetta “Starlight” Code is the 15 Geleziac Template of the Base Shield Planes of the Light Bodies, showing the rotational expansion that starts with the Tauren all the way up to the Diad, Miad, Monad, AmOrA Hub Cell, Edon, Adon and Aton. These layers correspond with the 15 Geleziac Layers of the Rasha Body.
