

Amsterdam Class 10

AMST (DVD 4) Counter Time: 1.39–2.25

Questions and Answers

1. Which encryption codes do the natural sperm and egg carry and what is the natural interaction between both?

- Sperm and egg each carry a portion of the core encryption. Both have a part of the DhaLA Codes. The sperm has around its center a KaLE Hara field with the DhaLA-Reisha. The egg has around its center a Mahara-Reisha field with the DhaLA-Krysta. When they merge together the Hara Krysta Body is formed with the DhaLA-LUma.
- Sperm carries a ring of 12 Shalons, Prana-Chi, negative charge, inside the Geleziac radiation. Egg carries a Ring of 12 Alons (holding Prana Joules), Prana-Kei, positive charge, inside the Geleziac radiation. Prana-Chi + Prana-Kei together form full Prana.
- Egg and a specific group of sperm both have a set of 12 encryptions of the Allurean Chambers 1 through 12. The sperm carry the even numbers and the egg the uneven numbers, which correspond with the Allurean Lines (Axis Lines). When egg and the specific group sperm come together, the process of life begins; the Allurean Imprint first comes together. The 6 vectors from both come together and form the 6 vectors from the AdorA and the 6 vectors from the EtorA side.

2. What is the natural process when sperm and egg come together?

- Only the sperm that carries the encryption for the 6th chamber will fertilize the egg. This fertilization point takes place on the 6th Allurean Line (Axis Line 6). The others of the sperm group take position on the Allurean Line corresponding with the encryption the sperm is carrying. The fertilization sets in motion the NaVE-Na Cycle (Partiki Birth cycle), which unfolds over the first 12 hours, where you have the creation of the First Partiki and the Second Partiki. They form the Triad, which is the point that the SEda Cycle starts (Axis 0), and progresses between the 12th–24th hour, culminating in the birth of the ELum-Eiradhona Spirit Body and the Tauren Light-Body seed. This is the start of the Takeyon cycles or the quantum-building expansion cycles, the forming of the Rasha Body and the Light Body. Between the 33rd and 56th day after the fertilization point, the Spirit enters the fetal body (fetal integration). The Spirit takes over the cellular process, a part of the Light Body structure sets the Krystal Spirals out into feeding the cellular growth and cellular structure, and a “new eternal life” begins. The physical birth will normally occur at about 38.5 weeks (Axis 2), when the Diad Soul Seed is born.

This whole process happens on our EtorA side (CW) and at the same time on the AdorA side in the opposite direction (CCW).

3. Why does fetal integration take place between the 33rd and 56th day after fertilization point?

- Once the Spirit Body is born it is still in Spirit, it is still safe, but it is connected and it now has part of its Rasha template built and grown. It is connected into the fetal pattern, but the Spirit and the consciousness have not come into the body yet. That does not happen at the fertilization point. It cannot, it would blow the physical matter form apart, because there is too much frequency, too much Base Pulse Rhythm in even the smallest bit of the spiritual energies. So it is 33 to 56 days after the fertilization point before Spirit can actually incarnate into the fetal body to make that a new person.

4. Why doesn't the process work naturally, and what are the consequences?

- The process doesn't work naturally because of certain mutations. Sperm naturally carry a Ring of 12 Shalons, Prana-Chi, inside the Geleziac radiation. The mutation takes 6 of the 12 units of Prana-Chi and reverses them—turns them into Kei—and pulls the other 6 into the core. This makes a mess and blocks the core and leaves only 6. When sperm and egg come together, even though the egg still carries the original imprint, it gets overpowered by the center. It pulls 6 of those Prana-Chi units into the center and creates a 6:6:6 configuration in the center that sets the whole mutation in motion. So the mutation starts from the beginning and is carried in the male gene line. The 6:6:6 seed atom turns the natural energies and structures of the Rasha Body in on itself and hijacks the Light Body from what would be the normal Krystal Spiral of expansion, into the Golden Meanie Spiral. This particular configuration hits right at the point in time when fetal integration would be starting and hijacks a portion of the Spirit into the body. Then it severs the connection to the Spirit Body. There are certain energies that are supposed to open the tailbone and end up in the head instead, where they literally reverse currents in the body and turn them in on themselves. This creates, instead of the natural flow between the Rasha bodies and the Spirit Body and the growing baby body, a Tube-Torus effect or the Yin-Yang mess. And that begins the process of the Metatronic harness, or the Bloom of Doom/Daisy of Death harness, which completely messes up the Light Body structure that is surrounding the growing fetus. It also gets the AdorA side stuck, where there is the other part of the consciousness that is in the AdorA manifestation vector and also can't go through a natural Adashi Cycle.

5. Which special codes are needed in the DNA that will allow, under certain conditions, the beginning of healing of this unnatural process?

- The Journey of this day will begin the process of activating the Mother Codes in the DNA, by activating the Jesheua Codes that are connected to the Codes of Aqua'elle. Aqua'elle was the name of Jesheua's daughter in the 7th line, the one child of the 7th line. She was named after the matrix from which her Spirit came. The Codes of Aqua'elle will begin the process of changing this in those males

who are working with it. Which means they will change all sorts of things about unnatural energy configurations that take place between males and females right now. We both end up getting distorted and we are carrying mutation. So it will begin the process that will eventually allow for healthy breatharian babies to be born, like we were all supposed to be. Once this mutation begins to release it will literally give the ability to bring genetic lines in, even if it is only for 223 years, that will carry the natural code, and that will allow for more people to be able to make it out in that 223 year period.

6. What is a Density Cycle and what is the development of the 4 Cycles of the natural Krystic “Birthday Chart”?

- The body will go through 4 Density Cycles, which correspond with 4 Transfiguration Points (TFP). Each Cycle is a period of “3+3 1 Leap.” The first 3 years is bringing in the Light Body frequencies from the EtorA and the AdorA side (each on their own side). The second 3 years is bringing the Eiradonis frequencies into the Light Body. Then you have the Flame Cycle, the full opening of the Adjugate Twin sets, where the frequencies of both sides are brought together; this is the acceleration year. That leads to the leap in Base Pulse Rhythm (BPR). That leads to the year of shift of the Angular Rotation of Particle Spin, where you would actually shift into processing the next Density frequencies. Then the next Density Cycle starts. Each of the Densities has a different type of energy. Density 1 is the heaviest or the densest frequency.
- When the baby is born it takes one year to finish the fetal integration process. At the first birthday you have TFP 1—here the Density 1 Cycle begins, the Incarnate Self.
From the 1st until the 4th birthday the Light Body frequencies are coming in.
From the 4th until the 7th birthday the Eiradonis frequencies are coming into the Light Body.
From the 7th until the 8th birthday is the acceleration year, the BPR Leap.
Birthday 8 is the end of Density 1.
From the 8th until the 9th birthday is the shift in Angular Rotation of Particle Spin into the next Density.
At the 9th birthday the Density 2 Cycle, the Soul Identity, starts, which corresponds with TFP 2.
From birthday 15 until 16 is the next Leap year in acceleration in BPR.
Birthday 16 is the end of Density 2, and then from 16 to 17 is the shift into the Density 3 cycle.
At birthday 17 you have TFP 3 and the Density 3 Cycle, the Oversoul, begins.
From birthday 23 until 24 is the BPR Leap year. Birthday 24 is the end of Density 3, and from 24 to 25 is the shift into Density 4.
At birthday 25 you have TFP 4 and the Density 4 Cycle, the Avatar, begins.
From birthday 31 until 32 is the BPR Leap year. Birthday 32 is the end of Density 4, and from 32 to 33 is the shift.
The 33rd birthday is the point at which you would progressively integrate the frequencies of the Celestalline Suns in the Rasha and Light Body structures. You would open up all the currents behind you because here you would be finished

with your 4th Cycle, which means you would hit your KaLA Eyugha. You would be an integrated Avatar, and at that point you would enter the Krystar state.

7. What happens in this natural process when you reach the state of an integrated Avatar?

- When the state of an integrated Avatar is reached, you would engage the KaLE-Hara and go through a natural Starfire Cycle and do the Adashi turnaround with the eternal body. The body would turn into the Hydrogeleziac state while it is going through the turnaround (reverse spin), and then it would re-solidify in the matter-base that is natural for the Adashi 1 Cycle. At the end of the Adashi 1 Cycle you would hit your BPR acceleration and then you would have the shift year. Then you'd go into the Adashi 2 Cycle, and then you'd go on into the Adashi 3 Cycle. Then you go into larger cycles, which have to do with going into cycles before going home into Source. You would first go into those larger ELum-Eiradhona Cosmic Cycles and then you would go home into Source and come back as kind of a Cosmos, as a fully Krysted Sun, a Sun in God, a flaming Sun of God.

8. What is the development of the unnatural "Birthday Chart"?

- There are certain leaps that if you don't make the leaps you go back around for the cycle. If you keep going back around for the same cycle and you never get your BPR high enough like it normally should be by integrating the frequencies that should be coming in, you get stuck to the point where you burn out the core energy quantum in the seed atom. That is what the mutation does. That is why we die, because we have the Metatronic code plugged into our body, and instead of natural Krystal Spirals and their natural shapes coming out and feeding the cellular structure, feeding the Spirit Body into the atomic body through the Eiradonis, that is blocked from occurring. So you get X amount of quantum that gets stuck at the fetal integration point and then that mutation kicks in. It takes that quantum, but that's all the body has—it can't bring in anymore of that eternal quantum. So as it grows—it'll still grow—it's feeding cellular structure, but it will grow to the point where it burns out that original quantum and there is none left. That is where the body starts to deteriorate. The death-genes kick in, which really start chemical imbalances and start to manifest themselves as cellular destruction. That happens very young, around age 11. It starts when we should be into our Soul Integration Cycle of Density 2. It creates what is called the Sextant Labyrinth, and it literally reverses the cycles partway through and never lets you make the leaps. You still get older, but you never get the frequencies of the other parts of the Light Body and the Spirit Body integrated into the physical form. Also parts of our consciousness, our memory, is lost, because these are portions of our Memory Matrix (our Light Body and the Spirit Body structure). So we can't even remember who we are. That is why we feel so lost and separated, and we lost our cosmic understanding.

9. How are you directly connected to the Hall of Records when you are moving through time?

- The HaRA-Krysta Chamber, The KaLE Hara Chamber and the DhaLA KaLAah Chamber are huge Krystar Vehicle Ascension Chambers. These chambers, which would run naturally, correspond directly with the 8-Cell Cluster and the 1st Cell. In the natural process you are directly connected to these because you have a small version of this inside, but you are walking around in it as well. So you have got your Hall of Records right around you as well as consolidated in a smaller version in your D1 Etheric level. Your larger one would be literally around you; you're walking around in it, and you're projecting energy out in front of you, and you're bringing the energy in from behind you; this is the natural circulation. If you're still moving outward in your Eckashi Cycle you'd be connected to the AdorA side through the back side, because it is behind you. You're moving outward on your vector—it's moving outward on its vector in the opposite way. But when you both get to the point where you hit your KaLE Cycles—the end cycles—and turn around, then you'd be coming back to face each other again.

10. What do you have to clear behind you before you really can raise your Eiradonis Body, and how can you clear this?

- When you start working with the Eiradonis Body, you actually bring it through from behind. Naturally you would be in complete horizontal alignment with your vector line, but because of the distortions you're actually twisted and "behind" is not behind. Your back is not facing the center; there is something like a big nasty shadow, a gaping hole that leads down into the YHWH Matrix through the Procyak Matrix.
- There are activations that the Aquafereion Shield is doing—actually the Aurora field, which is the AquA'elle Field—that actually shifts and allows the natural alignment. So you can pull the Eiradonis Body through the back like it needs to come in. And by doing that you can pull the mutation up and clear it through raising the Eiradonis Body.

11. Do you know how to raise your Eiradonis Body, and why do you have to do this?

- When you bring your Eiradonis Body up, you need to lay down to do it. The Eiradonis Body walks behind you. In order to bring the Eiradonis Body up you have to align with the HaRA Krysta Chamber, which is running vertically. You need to be lying down and horizontal in order to bring the Eiradonis up through the HaRA Krysta Chamber. If you try to bring it in while you are standing up, it will come through but it won't pass through your own internal Seed Atom and Akashic Record in the same way. So it is important to lie down and bring it up through the HaRA Krysta Chamber from behind you. It won't hurt you to do it if you are standing up, but it won't connect into the core in the same way that can be used for the Resurrection Technology.
- The Eiradonis Body is facing in the same direction as your body, and it is the Spirit Body of the AdorA side. The AdorA would have the same relationship with your Spirit Body.

By raising the Eiradonis you bring in the Spirit Body of the AdorA Manifest Body, and at the same time on the AdorA side your Spirit Body is moving in the AdorA Manifest Body. Raising the Eiradonis is the fast way to get the Divine Blueprint in. When you have the whole Divine Blueprint in you would bring the two Eiradonis Bodies together and it would allow you to go into the HaRA Krysta state. So by raising the Eiradonis Body you are progressively resurrecting the Divine Blueprint that is held in the Spirit Body, in the natural Akashic Record on the AdorA side, into the Physical System, which clears out layers of miasmatic mess from the distortion. You can do this with everything you are made of. Every shape inside of you or around you has an equivalent shape in the Eiradonis energy. So what you want to heal—for example a broken leg—bring it up and out in front of your body while you are laying down. The frequencies of the HaRA Krysta Chamber will purge it, will clear it, and then it can come back down again. The more you play with that, the more it really assists in regeneration or healing. At a certain point once you do the exercise it goes on autopilot, where it'll do slow cycles of just natural-like expanding and contracting, moving through, and every time it moves through it'll bring more of the Divine Blueprint back into the body from the Spirit Body, and it'll take more of the muck out and clear it and transmute it. But you can also work with the Eiradonis Body more consciously and do that more quickly, which would accelerate the Base Pulse Rhythm of how fast it comes in and out.

12. Where is the RashaLAe Body located and what really happens when you are going into a Rasha Body state?

- The RashaLAe Body is positioned within the natural Kathara Grid. The Kathara Grid represents the Light Body structure and the proportions of our body within it. The RashaLAe Body is positioned with the Kathara Grid's 12-Point at the 9-Point of the D-2 Kathara Grid. It is at the place called the Mentor Space, which is over the right shoulder. The D-2 Kathara Grid corresponds to the D-2 Telluric physical body.
- When you go fully into a Rasha Body state, which takes you into Krystar activation, the Angular Rotation of Particle Spin of your Light Body actually shifts and pulls into the Rasha state. So you get smaller and pull into the Rasha state, and do a 45-degree shift in Angular Rotation of Particle Spin in order to enter the Krystar state. Then you'd be able to manifest wherever you ended up or you're pointing yourself by thought, and come out the other side and re-manifest yourself back out in your physical form.

Vocabulary

1. Allurean Chambers:

These are a set of 12 Fire Chambers that have a direct connection to the core flows, the Eye of Allurea, the first Eye of God. The Allurean Chambers are running on the time vectors—6 vectors (12 vectors/vector horizons/event horizons) on the EtorA side and 6 vectors (12 vectors/ vector horizons/event horizons) on the AdorA side. This allows an energy flow between both sides.

2. Allurean Lines:

Lines running 45 degrees between the 12 Allurean Chambers. They are Fire Lines and give the ability to open the chambers. They correspond with the Axis Lines.

3. Fertilization point:

This is the point at which the sperm, which carries the encryption for the 6th Allurean Chamber, fertilizes the egg. This always take place on the 6th Allurean Line (Axis 6).

4. Fetal Integration:

The moment at which the Spirit Body can integrate in the fetal body. When the fetal body has reached a sufficient growth quantum to hold the new Spirit, that's the point at which the Spirit can come into and live in the fetal body, to make that a new person and take over the cellular process and growth.

5. Mother Codes:

Special codes within the matriarchal DNA carried by the Mother Lines; that goes for males and females. These codes have the ability, when they are activated, to heal this unnatural energy configuration process in the gene lines. The males who are working with it can start this healing process. The Mother Codes will be activated by activating the Jesheua Codes, which are connected to the Codes of AquA'elle, Jesheua's daughter. This activation was given in the Amsterdam workshop.

6. Birthday Chart:

The Natural Kristiac Time Cycle of the Manifest Body on the EtorA and the AdorA side.

7. Integrated Avatar:

In the natural process you are an integrated Avatar on your 33rd birthday. This is the point at which you have progressively integrated the frequencies of the Celestalline Suns in the Rasha and Light Body structures, and you would open up all the currents behind you because you would be finished with your 4 Density Cycles. Which means you would hit your KaLA Eyugha and at that point you would enter the Krystar state.

8. Eckashi Cycle and EckashI Return Cycle:

Eckashi Cycle is the expansion on the Manifest EtorA side.

EckashI Return Cycle is the return on the Spirit AdorA side.

9. Eiradonis Body:

Your Eiradonis Body is the Spirit Body of the AdorA Manifest Body, and is facing in the same direction as your body. The Eiradonis of the Manifest Body on the AdorA side is your Spirit Body, and is facing in the same direction as the Manifest Body on the AdorA side. The Eiradonis holds the Divine Blueprint.

10. Resurrection Technology:

What you're doing in this technology is resurrecting your Divine Blueprint, the original blueprint of your Spirit Body, which would be held and is still natural in the Spirit Body. You've been progressively using resurrection technology by raising your Eiradonis Body.

11. RashaLAe Body:

RashaLAe Body is the Rasha Body, Dark Matter template, of the Outer Body. The RashaLAe Body is positioned with its 12-Point at the 9-Point of the D2 Kathara Grid. The D2 Kathara Grid corresponds to the D2 Telluric physical body. It corresponds with the "Mentor Space" you learn to use in Kathara-1. When you do a "Gliding Journey" you need to travel in your Rasha Body together with your Krystar Krystal Capsule.

12. Krystar Krystal Capsule:

This is your Ascension Merkaba Vehicle, which makes it possible to travel in time.

Multiple Choice

1. What is natural sperm carrying?

- (a) A ring of 12 Alons, Prana-Kei, positive charge, inside the Geleziac radiation.
- (b) Around its center a Mahara-Reisha field with the DhaLA-Krysta.
- (c) A Ring of 12 Shalons, Prana-Chi, negative charge, inside the Geleziac radiation.
- (d) A set of 6 encryptions of the Allurean Chambers.

2. Is the Spirit Body connected to the fetal body before the Spirit Body can come into and live in the fetal body?

- (a) Once the Spirit Body is born it is still in Spirit, but it is connected into the fetal pattern, and from that point it takes over the cellular process and growth of the fetal body.
- (b) From the fertilization point there is a connection between the Spirit Body and the fetal body.
- (c) There is no connection between the fetal body and the Spirit Body before fetal integration.
- (d) Once the Spirit Body is born it is still in Spirit, but it is connected and it now has part of its Rasha template built and grown. It is connected into the fetal pattern before it comes into and lives in the fetal body.

3. What is the 6:6:6: Seed Atom doing?

- (a) It turns the natural energies, hijacks a portion of the Spirit Body, and severs the connection between the Spirit Body and the Manifest Body.
- (b) It creates a Tube-Torus effect or the Yin-Yang mess.
- (c) It turns the natural energies and structures of the Rasha Body in on itself and hijacks the Light Body from what would be the normal Krystal Spiral of expansion, into the Golden Meanie Spiral.
- (d) It creates unnatural energies in the body; these energies reverse certain currents in the body and turn them in on themselves.

4. Why it is important to activate the Jesheua Codes?

- (a) By activating the Jesheua Codes, the Mother Codes will be activated and then all mothers can heal the unnatural energy configuration process.
- (b) By activating the Jesheua Codes, which are connected to the Codes of AquA'elle, Jesheua's daughter, the Mother Codes will be activated. These codes have the ability, when they are activated, to heal the unnatural energy configuration process in the genes lines. Certain males who carry this code can start this healing process.
- (c) By activating the Jesheua Codes, we can heal our DNA.
- (d) By activating the Jesheua Codes, which are connected to the Codes of AquA'elle, Jesheua's daughter, the Mother Codes will be activated. These codes have the ability, when they are activated, to heal the unnatural energy configuration process in the genes lines in everyone.

5. How many Transfiguration Points (TFP) are there in the natural Krystic "Birthday Chart," and with what do they correspond?

- (a) There are 4 Transfiguration Points, which correspond with your birthdays. At birthday 9 you have TFP 1. It takes 8 years before you reach the next TFP. So at birthday 17 you have TFP 2. At birthday 25 you have TFP 3, and at birthday 33 you have TFP 4.
- (b) There are 3 Transfiguration Points, which correspond with 3 Density Cycles.
- (c) There are 4 Transfiguration Points, which correspond with the 4 Density Cycles. At the end of Density 1 you have TFP 1. At the end of Density 2 you have TFP 2, etc.
- (d) There are 4 Transfiguration Points, which correspond with the 4 Density Cycles. When Density 1 starts, you have TFP 1. When Density 2 starts, you have TFP 2, etc.

6. When do you reach the state of an integrated Avatar in the natural Krystic "Birthday Chart"?

- (a) Birthday 32; this is the end of Density 4, the Avatar Density.
- (b) When you are a fully Krysted Being.
- (c) Birthday 33, where you progressively have integrated the frequencies of the Celestalline Suns in the Rasha and Light Body structures; you would open up all

the currents behind you because you would be finished with your 4 Density Cycles.

(d) At the end of the Adashi Return Cycles.

7. When you go home into Source in the natural Krystic process, how are you coming back?

- (a) As a Reisha.
- (b) As a Star.
- (c) As a fully Krysted Sun, a Sun of God.
- (d) As a Son of God.

8. Why can't we make the leaps that are needed to go from one Density to the next Density in the time cycle of the Manifest Body?

- (a) Because of the mutations we can't remember who we are; we don't know how to do this.
- (b) We don't have sufficient quantum to make our BPR high enough; because of the mutation we have the Metatronic code plugged into our body.
- (c) Because of the mutations we lost portions of our Memory Matrix.
- (d) Because of the YHWH Matrix we do not get enough quantum to make the leaps.

9. What is meant by "the death-genes kick in"?

- (a) The moment at which the body burns out the original quantum, it starts to deteriorate. Chemical imbalances and cellular destruction start from that point.
- (b) You get older but you never get the whole frequencies of the Spirit Body integrated into the physical body.
- (c) We die because of the mutations.
- (d) We die because of the working of the "Sextant Labyrinth."

10. What are you doing by raising your Eiradonis Body?

- (a) By raising the Eiradonis Body, you bring it through the 15 Geleziac Layer structure.
- (b) By raising the Eiradonis Body, you are progressively resurrecting the Divine Blueprint that is held in the Spirit Body, in the natural Ecoushic Record on the EtorA side, into the Physical Body, which clears out layers of miasmatic mess from the distortion.
- (c) By raising the Eiradonis Body, you bring your Seed Atom in alignment with the Seed Atom of your Adjugate Twin.
- (d) By raising the Eiradonis Body, you are progressively resurrecting the Divine Blueprint that is held in the Spirit Body, in the natural Akashic Record on the AdorA side, into the Physical Body, which clears out layers of miasmatic mess from the distortion.

11. Why do you have to lie down when you raise the Eiradonis?

- (a) The Eiradonis can come through better that way.
- (b) You have to be in alignment with the Hall of Records.
- (c) In that way the two Eiradonis Bodies can come together.

- (d) You have to be in alignment with the HaRA Krysta Chamber, which runs vertically. If you lie down you're horizontal in the HaRA Krysta Chamber, and you need this to bring the Eiradonis up through the HaRA Krysta Chamber. The Eiradonis has to pass through your own internal Seed Atom and Akashic Record in the same way.

12. What creates a full Krystar activation?

- (a) The state of an integrated Avatar.
- (b) When you are going fully into a Rasha Body state.
- (c) Full activation of the Rasha would create a full activation of the Light Body structure, which would create a full Krystar activation.
- (d) All of the above.

Multiple Choice Answers:

1.C, 2.D, 3.C, 4.B, 5.D, 6.C, 7.C, 8.B, 9.A, 10.D, 11.D, 12.D.

The dynamics of the emerging MCEO materials involve the reality that the detailed understanding of major topics is under continuous development; therefore, the contents, and level of detail herein, are as advanced as possible UP TO the date of the workshop recording.
