

# Amsterdam Class 11

AMST (DVD 5) Counter Time: 0.50 – 2.46

## Questions and Answers

### 1. What are Seeds of Suffering?

- Our partial Fall from another living matrix, the M31 Andromeda Galaxy. Distortions were created where the natural Krist Codes were bended.
- 350 BYA: The Fall of Procyus, Rajhna/Jhala Star in M31. The part that fell became Procyak and was named Abaddon. The separation of the Milky Way from Andromeda M31 started because of the attack by the Appolyon from the Wesadak Black Hole System.
- 250 BYA: The Fall of Lyra, Kathara Center 12 of M31. It became connected to the Milky Way.
- 150 BYA: The Fall of Metatron. The Host Mission of the Metatron Collective failed and then the YHWH Matrix was formed and connected to Abaddon. Abaddon was plugged into the Arimathaea Wormhole (or Cube Matrix) that is eating our Milky Way and connected to the Appolyon Matrix in the Wesadak System.
- 9558 BC: The Fall of Atlantis. Right before the Fall the Hibernation Zones were formed by reversing the light fields; they were inhabited by FA to control Earth as a prison planet.

### 2. What are the Milky Way Mysteries?

There are distortions (“Daisy of Death”) in the solar plane of our Solar System, which are a reflection of the distortions (“Bloom of Doom”) that are in the Galactic Plane of our Milky Way System. We are in the middle of an unresolved mystery.

- Our Milky Way is the “Procyak Matrix” since the Fall of Procyus (M31 Andromeda). Procyus became Procyak, called Abaddon, which is in the center of the Milky Way.
- A piece of Procyak became Procyon in the Canis Minor System. Another part became Prolaris, which then got reversed in Polaris, our North Star, to plug us in the center of the Milky Way.
- In the center of the Milky Way scientists found Sagittarius A, which is the fallen part of ObeYon ( M31 Andromeda, Kathara Center 8), reversed into OberYon.

### 3. What is the “Bloom of Doom”?

- This is a technology that changes first of all the proportions of the Kathara Grid, which changes all of the mathematical relationships between ARPS and polarity.
- The petals are spaced at 60 degrees from the central vertical axis, as opposed to the natural 45 degrees of the *phasing* Lotus Arc Sets.
- By hijacking the original Lotus Arc Sets where they had been first partially split and reduced in quantum, natural breathing is not possible anymore.
- In a natural system the Kathara Grid has the 12 on top and an open spinning rod with

Yan-Yun Flows to communicate energy. In the “Bloom of Doom” the rod does not spin anymore, and instead of natural flows looking like a butterfly, a “Poison Apple” magnetic grid is formed by unnatural Yin-Yang flows. The whole Fall is plugged into this technology, which is also referred to as the “Daisy of Death” or “Flower of Artificial Life.” It bends natural structure and the natural Law of Physics as they work in a Kristiac Universe, and perverts them in order to create Black Hole systems feeding to maintain their existence and their quantum level so they don’t implode. They vampire energy from living systems.

#### **4. What is the 666 BeaST configuration?**

- The 666 configuration has to do with a series of 6-Gates. One of them is plugged into Appolyon, a star in the 6 position of the YHVH system that carries the encryption over from the Fall side of the Wesadak Matrix, a particular Fall system referred as the Yod Hey-Vod-Hey System. The other 6-Gates are Procyon and the Fallen part of Sirius B.
- Another symbolic meaning of the 666 is that there are 3 sets of the Bloom of Doom. They all are on the 6 positions and they all have 6 flowers and 6 flower petals. There is a smaller one that connects into the Abaddon Matrix and one that connects into the Sagittarius A OberYon Matrix, both of which are the Procyak Matrix, and there is another one on the other side that plugs into the YHWH Matrix and the Wesadak side of the adjacent Eckasha’s Ecka-Veca Black Hole System.

#### **5. Where was the Yod-Hey-Vod-Hey or the YHWH Matrix formed?**

- In the Wesadak System. It is connected to the Fallen part of the Rajhna/Procyus star that is now called Abaddon, which is at the center of the Milky Way. They have not found that one yet. They found the one that is called Sagittarius A.

#### **6. What is the difference between the Krystal Spiral and the Metatronic Spiral?**

- The Krystal Spiral always has a direct relationship with its center, the First Creation Point, whether it is spiralling CW or whether it is spiralling CCW to form the other half of the Flame on the AdorA side. The Krystal Spiral is a living spiral because there is in-flow and out-flow; there is a gift from Source and there is a gift of Backflow giving back, and then there is a gift of Backflow Return. It is a constant give and take of energy between a living God-Source and a living Matrix. The quantum builds by the natural ratios of the Kryst Code.
- The Metatronic Spiral starts out bigger than the Krystal Spiral because it is trying to harness, eat and override the living spiral. It has no center and needs to tap into the Krystal Spiral to capture that energy. The more the Metatronic Spiral expands the more it eats, getting closer and closer to the Golden Mean Ratio. It creates a Tube Torus that sucks energy out and throws it back in. It regurgitates its own energy over and over and sucks energy off of other things.

#### **7. What is the Caduceus Network?**

- This is a symbol that is used all over as the sign for healthcare and medicine and pharmaceuticals. It is part of the BeaST design that is holding in place the NETs, which run through and create the Hibernation Zones. It is what is holding the DNA mess.
- This Caduceus Network is taking what would be the natural currents from the Allurean Flows, and it is polarizing them and twisting them. There are 6 of these aligned with 6 of the Allurean Chambers, and there is one large one that runs where our Rod should be, but not at the same angle that our Rod should be.

- They shut down the natural Rod. The unnatural one has been activated, but at least this process is harnessed by the Guardians so it doesn't cause a quick roll of the NETs.

### **8. Where is Urtha situated?**

- Urtha is situated in our atmosphere on the EtorA side at a different Angular Rotation of Particle Spin (ARPS) in the M31 Andromeda Galaxy, Gate 3.

### **9. What is the Aquinos Matrix?**

- This was the original Kristiac structure of our Ecka-Veca System PCM Particum Universe quadrant in the Andromeda System.

### **10. What has the BeaST Machine intentionally done to our Solar System and what does the Aqua'elle Matrix prevent?**

- With the BeaST Machine the FA stretched the natural plane alignment in our Solar System, tilted things at various angles and locked it into the E-Umbi Lock of the Milky Way Black Hole System, progressively pulling us fully into the Milky Way plane.
- Our Solar System now looks like a mini-version of the Procyak Matrix Black Hole because its original Kathara Grid is pulled in an unnatural configuration characteristic of the Bloom of Doom.
- Earth would rotate with the natural shield of the Aqua'elle Matrix in relation to the Aquinos Andromeda System. It was the one place that held at its core the direct link through the Aqua'elle Matrix into Urtha and up to Sala-Sira. It links to the center star (Azur-A) directly into the Halls of REisha-TA in the larger Cosmic Matrix. Our original Solar System had 12 planets. Planets birth out from their central star in a specific order, each having a specific orbit and encryption.
- The alignment with the Milky Way tilt has given us our illusionary 9-Planet structure; Earth was stretched out into Mars's orbit. They shattered Star Gate 5, Maldak, and forced Mars into that orbit with the Asteroid Belt as result. By pulling the orbit of a planet into another orbit, you change the nature of time and block part of the energy flow. Nibiru was Stargate 12, Charon Stargate 11 and Pluto Stargate 10.
- Now some planets are held in tilted orbits to hold the arcs of energy in very specific ways to keep us in alignment with the larger Black Hole System. The FA try to pull in the rest of M31 because that would give them lots more food.
- That is not going to be allowed to happen thanks to the Aqua'elle Matrix. The Aqua'elle field can rotate, so it creates the option of realignment; you can pass back in on a tilted axis and then be able to be gently pulled back around to go back into your natural Angular Rotation of Particle Spin.

### **11. What is Ascension Earth?**

- Ascension Earth is also called the Aurora Aqua'elle Matrix.
- It is a part of what we call the Aurora Field, a matrix that is on the AdorA side, which is in the same place as we are, but on the opposite spin. This is a natural way of how Ecka-Vecas operate with their AdorA and EtorA sides.
- It is a Matrix that interfaces between the Milky Way and the Andromeda Galaxy, and it is a System that is part of what is called the Polarian Host Network System. On the AdorA side there is a corresponding part referred to as the Polarian Gates. These gates are being used as part of the support system here.

## **12. What are the Aurora Safe Zones?**

- These are platforms in Ascension Earth that we are being trained to access if things go bad.

# **Vocabulary**

## **1. Ecousha Platform:**

Platform in between the Aurora Platforms.

## **2. Slide Fields:**

These are fields into which we are being trained to eventually biologically slide.

## **3. Gliding:**

What we are doing when we do Rasha Body Projections.

## **4. Yan-Yun Flows:**

Natural electromagnetic flows through Light Body and Spirit Body systems.

## **5. Bhar-DhAe Cycle of the Sun:**

End part of a Bhardoah Cycle, at which point the Sun starts to spew more energy and starts to expand on its way to becoming a red giant if it has a certain mass.

## **6. Procyak Matrix:**

Another name for the Milky Way Galaxy.

## **7. M31:**

Andromeda Galaxy.

## **8. Urtha:**

Stargate 3 in the M31 Andromeda Matrix, the Aquinos Matrix.

## **9. Sextant Clock:**

This runs our bio templates and is the reason why we die.

## **10. AnshaTAsa Passage:**

Line that is coming from Aquareion Matrix to hold open Earth's Prana Seed for a period of time, in order for the life forms to stay in the Ascension Cycles and be capable of ascending by their re-generated Kristiac Codes.

## **11. KaLA-Krysta:**

The Adashi Ascension Path.

## **12. Veca-SEda core:**

The 1<sup>st</sup> Sun Galaxy from which the Universe is born.

# Multiple Choice

1. **The Aurora Platforms have to do with the \_\_\_\_\_.**
  - (a) AquA'elle Matrix
  - (b) Cloud Cities
  - (c) Sagittarius A star
  - (d) Hibernation Zones
  
2. **How many Aurora Platforms are we being taught about?**
  - (a) 1
  - (b) 2
  - (c) 3
  - (d) 4
  
3. **What place does a person finally need to go through in order to go Home in a natural evolution?**
  - (a) Sirius B.
  - (b) Urtha.
  - (c) Andromeda M31.
  - (d) Tara.
  
4. **What is the Coronasphere of a star?**
  - (a) The Magnetosphere.
  - (b) A sphere of continuous circulatory energy between Source and star.
  - (c) The Ozone Layer.
  - (d) The Safe Zones of a star.
  
5. **How is the Ozone Layer formed?**
  - (a) The Ozone Layer is formed by the Aurora Platforms.
  - (b) The Ozone Layer is formed by one of the Hibernation Zones.
  - (c) The Ozone Layer is formed by the Van Allen Gap.
  - (d) The Ozone Layer is formed by the Yan-Yun Flows.
  
6. **What is natural evolution about?**
  - (a) Engaging the Hydrolase Conversion and going into the Hydrogeleziac state of Living Light.
  - (b) Travelling through the Allurean Chambers.
  - (c) Running the core frequencies of the Fire Chambers.
  - (d) Sliding to Urtha.
  
7. **The AnshaTAsa Host Line is about \_\_\_\_\_.**
  - (a) speeding up the Bhardoah Cycle in order to get the system out as soon as possible
  - (b) protecting the Milky Way against intruders
  - (c) holding open Earth's Gates until the end of the Bhardoah part of the death cycle of the Sun
  - (d) bringing the whole place through what is called "The Bridge Zone"

**8. What is an Adjugate Twin Set?**

- (a) A pair having different vector lines.
- (b) A pair having different vector lines in a 90 degree angle to each other.
- (c) A pair on the same vector line, having different event horizons.
- (d) A pair on the same vector line, having the same event horizons.

**9. What is the Path of KaLE-DEma?**

- (a) The full Fall Path.
- (b) Path of Reincarnation.
- (c) Fall into Black Hole status.
- (d) All of the above.

**10. Jhala' Suns are the \_\_\_\_\_.**

- (a) 12 Stars of a Galaxy in a Kathara Grid configuration
- (b) 12 Stars of a Universe in a Kathara Grid configuration
- (c) Density Locks (the E-Umbi, Rahjna, Mahadra, Adhrana) in a Universe
- (d) Density Locks (the E-Umbi, Rahjna, Mahadra, Adhrana) in a Galaxy

**11. JhA'ia Suns are the \_\_\_\_\_.**

- (a) 12 Stars of a Galaxy in a Kathara Grid configuration
- (b) 12 Stars of a Universe in a Kathara Grid configuration
- (c) Density Locks (the E-Umbi, Rahjna, Mahadra, Adhrana) in a Universe
- (d) Density Locks (the E-Umbi, Rahjna, Mahadra, Adhrana) in a Galaxy

**12. What is the name of the Ecka Sun (where the 12 Gate connects to) from which the Aquinos Universe was born?**

- (a) Ahn-TAus.
- (b) Sala-MA'-eah.
- (c) O-ShE'na.
- (d) ProsEda.

**Multiple Choice Answers:**

**1.A, 2.D, 3.C, 4.B, 5.B, 6.A, 7.C, 8.C, 9.D, 10.C, 11.B, 12.D.**

The dynamics of the emerging MCEO materials involve the reality that the detailed understanding of major topics is under continuous development; therefore, the contents, and level of detail herein, are as advanced as possible UP TO the date of the workshop recording.
