## Questions and Answers

1. **What is utilized in Keylontic Science in order to stimulate the activation of frequency via the optical-pineal complex in our heads?**
  - Symbol code images.
2. **What is the "secret blueprint" that you don't see, behind which and under which matter is manufactured and is accreting?**
  - The Holographic Template.
3. **The Holographic Template starts with what?**
  - Units of the consciousness of God Source.
  - Primal substance.
4. **"Big bangs" are a result of certain mechanics that have to do with what?**
  - The template beneath them.
5. **There is an order and an intelligence to the way the universe is structured. That order has, for ages, been referred to as what?**
  - The Krist.
6. **When you accept an idea, what have you really accepted?**
  - An energy pattern: You have manifested that pattern inside your energy structure and it will faithfully reflect outward some version of what you just accepted.
7. **The "secrets of the Zodiac" actually have to do with what?**
  - Merkabic alignments – or *misalignments*, as is the case in our current situation on planet.
8. **What is the original gift given to everyone in creation?**
  - The Eternal Life system.
9. **How does the Krist template work?**
  - It works in a form of action and reaction. There will be consequence to action, and even thought is action (it's an inner action).
  - It has a set of self-regulating rules and balances.

### **10. What do scalar standing waves create?**

- Intimate interwoven patterns that then literally create the structure of dimensional fiber, of electromagnetic energy, by which things can come into manifestation as individuated forms of consciousness.

### **11. Where is the love in these teachings?**

- We are all swimming around in a pool of unconditional and absolute love—the gift given to us all by Source. Even the tiniest aspects of creation, the subatomic scalar waveforms, received this gift from Source. These teachings show us the scientific structure of Source, from the minutest waveforms to the largest cosmic bodies—they show us the science of spirituality. The structures are fascinating scientifically, but all of the structures and graphs and charts are really illustrating conscious beings, who, like everything else in creation, are always completely loved by Source. If we are studying the structural framework of Source, which is built upon absolute love, then we are in effect studying (focusing our energy upon) that absolute, unconditional love that creates and surrounds us all.

### **12. Why do we not physically see the standing wave-forms that make up every atom in existence?**

- Our consciousness has anchored itself into a very specifically organized pattern or shield of Partiki units, of standing waves, that bends the energy of our consciousness into very specific relationships so we are able to see different types of reality fields. And for many thousands of years, our races have been stuck in just one reality field or perceptual channel. Until we can again free up our minds *and* body mechanisms, we will be phase-locked into just this one limited perceptual channel and we won't be able to see (or fully co-create with) the waveforms that make up the fabric of the cosmos.

## **Vocabulary**

### **1. CDT Plates:**

Cloister-Dora-Teura Plates. These are very small holographic recorder discs that exist in physical form. They have the ability to record multi-timelines of historical record—almost like having an electromagnetic video camera with lots of different lenses, which could point in all directions and literally record and store for infinite amounts of time. They contain the records of the Freedom Teachings.

### **2. Ante-matter:**

Density-5 gaseous light; the state of unification from and to which matter and anti-matter perpetually rebirth and return home.

### **3. Crystal Body:**

The Blueprint upon which matter and identity will manifest. Everything in manifestation, including the entire universal framework itself, has a Crystal Body structure.

### **4. Hologram:**

The holographic projection that we perceive as a solid, 3-dimensional matter-based reality field.

### **5. Reuche Time Shifts:**

Planetary merkaba acceleration points, through which the planetary merkaba speeds up and makes a leap in the accretion of frequency into its shield, and then slows down again into another frequency band. Reuche shifts have been occurring on planet since 2003.

### **6. Moda-AdhurA:**

The inner Heliotalic transduction station in the center of the brain, which when activated helps to clear and heal the artificial Zodiacal fetal imprint (one of its many beneficial properties and uses).

### **7. Heliotalics:**

Solar light frequencies from the Ecka God Worlds, which first became available for use on Earth in 2003.

### **8. The Krist and the Chrystallah [note: other KS materials might spell Chrystallah with a "K" instead of "Ch" as it is spelled in the SSC manual]:**

The two main mathematical core programs upon which all of creation—objectified manifestation—began. They allow for the perpetual motion continually regenerative cycling of consciousness into and out of manifestation, in perfectly synchronized and balanced cycles of "beginnings" and "endings."

### **9. Keylons:**

Three-dimensional forms of light and sound waves. They're three-dimensional because you have three different lines of Partiki (PKI), PartikA (PKA) and Particum (PCM) flashing on and off at three different rhythms, creating a three-dimensional format.
