Questions and Answers

1. (a) **How is the Karmic Imprint formed and how does it enter our physical body?**
(b) **What are the consequences of carrying the Karmic Imprint?**
 - (a) When the process of forming dark crystals that vibrate at a totally opposite polarity in the Morphogenetic Field is compounded, it forms the Karmic Imprint. This miasmatic build-up of dark crystals blocks anything coming through from the higher levels. Instead of being able to bring the light in to clear those crystals, the Karmic Imprint progressively brought more of those crystals in at a faster rate than the light coming in.
 - The original reversed Karmic Imprint enters the physical body in Harmonic Universe 1 (HU-1) via the coccyx, the tailbone at the base of the spine.
 - (b) The Karmic Imprint blocks the light coming in from the higher levels; we get denser—our consciousness moves slower, and we end up in HU-1.

2. (a) **How can miasmatic grids in the Morphogenetic Field be cleared of the Karmic Imprint according to the Guardian Alliance (GA)?**
(b) **What is the advantage of using such a method?**
(c) **How does this method of clearing the Karmic Imprint differ from other schools of teaching?**
 - We can find 1 or 2 key core elements of the Morphogenetic Field that we want to flip, reverse that polarity at its point of origin and put the whole bunch of them in line with the Heroic Probability of the Soul's intentional path. That will erase thousands of years of karma accreted in this cycle.
 - (b) We can regulate the rate of Karmic Imprint clearing—we can clear ourselves in one big bang, blow ourselves right out of matter and completely into full cognition, or take it a little slower so that we can remember the process.
 - (c) The method involves using specific energy dynamics to clear the Karmic Imprint as the priority for survival rather than having to walk through karma, which is time-consuming—we can always catch up with the lessons later. In contrast, some schools teach that we have karma because we deserve it, because we have to work this through for the Soul to learn the lessons the hard way; get it right to make it go away.

3. (a) **Define the God Seed and its existence.**
(b) **Identify the dimensional portal leading to the God Seed in terms of its location on a planet within a star system.**
(c) **Why is this portal important in our Time Matrix?**
 - (a) There are 3 definitions of the God Seed in this DVD segment:
 - (1) It is the original point of Creation.

(2) It is the original point of All That Is.

(3) It is the Home of the Heart and Mind of God.

The God Seed exists in Eternal Time, which is beyond the Time Matrix where all is known and never forgotten. It is gestalt consciousness, from which infinite members of our family of consciousness are created.

- (b) To access the God Seed, visualize a tube/beam of light from the 7th chakra to the **8th dimensional (D8) portal** at the core of the planet **Mintaka** within the **Orion Star System**.
- (c) The portal is important as it allows consciousness to move back and forth in and out of the Time Matrix.

4. (a) **Describe the direction of spin of the God Seed energy and how it helps to clear the original reversed Karmic Imprint at the coccyx.**

(b) **Describe the impact of the God Seed energy on our Morphogenetic Field, the Hova Bodies and the level of protection it offers.**

- (a) The **God Seed energy** spins like a double helix strand of DNA with energy currents spiraling down clockwise and counter-clockwise together into the spark of light encapsulating the shadow of light at the coccyx. The shadow represents the original reversed Karmic Imprint at the point of entry to HU-1 here. The God Seed energy merges with that spark of light, making it bigger and stronger, while the shadow of light comes apart and is transmuted into the light as the frequency is too high to sustain it.
- (b) Once the shadow is transmuted, it begins the natural process of releasing multi-dimensional energies. The God Seed codes will start to activate within the Crystal Body, the Morphogenetic Field. The karmic pattern will bring into our line of experience other members of our family of consciousness that came in on the same pulse of consciousness as us—humans came in on exactly the same pulse. Our family link is established when we re-twist our pulse of consciousness with the codes of the God Seed.
- This energy will begin to heal the Hova Bodies so that they will begin to merge over time.
- Opening the lines of communication through the energies of the God Seed is a way of protecting ourselves from distortions that make that energy run away.

5. (a) **How is love defined in Keylontic Science, and how is this feeling created in the meditation?**

(b) **What are the experiential attributes that can result from the regular practice of this meditation for 6 months to a year?**

- (a) Love is a state of vibrational harmonization. The meditation establishes a state of harmonization of our consciousness with the God Seed. We feel the love from the God Seed as it begins to travel down our Pillar of Light into our physical body.
- (b) We can begin to hear the songs of the universe and words of our Christed Self, Rishi, and our Monad identity. The regular practice of this meditation can give us the ability to bring into manifestation the direct cognition of our God Seed identity.

6. (a) **In which part of the physical body do the Kee-Ra-ShA spirals exist?**
 (b) **What is the purpose of activating the Kee-Ra-ShA?**
 (c) **How relevant is the Kee-Ra-ShA to most people?**
 (d) **Why isn't it advisable to activate all the Kee-Ra-ShA spirals?**
- (a) The Kee-Ra-ShA are spirals of energy that exist at the coccyx.
 - (b) The Kee-Ra-ShA spirals are the cosmic strands of energy that connect the multiple levels of identity with the cosmos. Activating the Kee-Ra-ShA spirals at the coccyx will begin access to our original point of entry into HU-1. It will set into motion within the Morphogenetic Field the resonance that will draw us and our family of consciousness together for the next step of evolution. It will begin the process of our homecoming and our gestalt consciousness coming back together to become the God Seed again.
 - (c) In most people the Kee-Ra-ShA are dormant. Only a small amount is necessary to sustain the physical form here.
 - (d) You don't want to wake up your Kee-Ra-ShA spirals all at one time, for you can possibly throw yourself out of existence in the expansion back into the God Seed, and that will scare the people around you.
7. (a) **Describe the attributes of HU-4 experienced in the meditation in terms of color, matter form, and manifestation capabilities.**
 (b) **What is the matter form of HU-4 compared to in the meditation?**
- (a) At HU-4 we can see shades of pale silver and gold swirling like liquid metal/light. We can shapeshift (i.e., take any shape our body wants), and create Oversoul families (that will in turn create race strains in the lower harmonics).
 - (b) The fluid flowing liquid metal is compared to lava that comes from a volcano.
8. (a) **Outline the route of the return journey from the God Seed.**
 (b) **What is the additional visualization required to shift the D8 consciousness to the highest dimension mentioned in part (a)?**
 (c) **How is the return journey from the God Seed different from the forward one?**
- (a) God Seed → Monad → Energy Matrix → D8 portal → D15 → HU-4 → HU-1.
 - (b) You visualize yourself walking or bouncing as a ball of light on the Dimensional Scale from D8 to D15.
 - (c) The forward journey does not include the "side-trip" to D15 and HU-4.
9. (a) **Define the Monad in terms of its relation to the Time Matrix and its potential for expanding into higher Levels of Identity.**
 (b) **What is the color of the Monad during the meditation?**
- (a) The **Monad** and the **Monadic Imprint** are the key to leaving the Time Matrix at D8 and being able to achieve ascended mastery in the expansion back into God Source.
 - (b) In the meditation, the Monad is silver-blue.

- 10. (a) What is a Monadical reversal, and how does reversal affect our Morphogenetic Field, Pillar of Light, Hova Bodies, the Levels of Identity, physical body and Earth body?**
- (b) What Matrix is created out of the Monadical reversal, and which Harmonic Universes does it reside in?**
- (a) If the Monad is a sphere of energy, and in that sphere of energy there are little shapes pointing at one direction, that's the direction that kept the electromagnetics intact in the Morphogenetic Field. To reverse the Monadical Imprint would be to flip those shapes over, create the mirror image, which will reverse the polarity of their charge.
 - What the **Monadical reversal** does to the consciousness in the Time Matrix is that it severs it from the Pillar of Light that connects us all the way up.
 - The Monadical reversal keeps the lower Hova Bodies of the Time Matrix from plugging into the higher Hova Bodies of ascended mastery, which keeps you locked in time.
 - If **Monadical reversal** happens here, not only will the Earth incarnate here be locked in its own Time Zone in HU-1, all the higher aspects of identity will be phase-locked into their dimensions—you get stuck because your Hova Bodies can't integrate.
 - If there is enough **Monadical reversal** in people, it will create distortions in the Earth's Morphogenetic Hova Bodies where they are unable to integrate during the ascension cycle. If this process of integrating the multi-dimensional Hova Bodies has started and something blocks that, it creates instability within the grids.
 - If our physical body contains very bad miasmatic programs because the Hova Bodies don't integrate, it will make the electrical energy coming in from the higher body fragment all over the place, resulting in disease or distress in the physical system. The Earth body will do the same—it will create a condition of tectonic stress, and if that stress is too bad it will create Earth changes that we don't want to see.
 - (b) The Illuminati are basically beings who have undergone complete Monadical reversal. They exist from HU-1 to HU-4.
- 11. (a) Define “code convolution” with reference to the name of a group who caused the condition.**
- (b) As a result of code convolution, which 2 Levels of Identity and their corresponding Harmonic Universes are disconnected from one another and why?**
- (c) What are the ramifications of code convolution on the behaviors of beings in HU-3 and HU-4?**
- (a) The Lyrans caused a condition called code convolution by combining too many of the same type codes in strange configurations. They started to mix & match consciousness, play with the codes and see what else they could come up with as far as creating new versions of themselves. At a certain point, if you mess with the original consciousness too much, it becomes something different from what it was originally.
 - (b) The Reverse Matrix Avatars in HU-4 decided to cut the connection between themselves and their higher identity Rishis in HU-5 because the Rishis were

trying to direct them to get back into harmonization & they took that as taking away their free will. So they made a choice to sever themselves.

- (c) In HU-3, some members of a race of etheric beings, who became distorted because of the code convolution of the harmonic levels above them, began to develop characteristics like warring consciousness, i.e. one consciousness trying to dominate another. They lost touch with the oneness and began to work against each other.
- Certain groups in HU-4 became very aggressive toward other groups, and they were not responsive towards working with the Law of One. They decided purposefully & willingly that they didn't want to play by whatever rules were being set by the whole.

12. (a) What is the difference between an Avatar from a Light Matrix and another from the Reverse Matrix?

(b) How does the Morphogenetic Field of a Reversed Matrix in HU-4 deteriorate over time, and how can this be arrested?

(c) How do the Reverse Matrix Avatars sustain themselves energetically?

- (a) The Avatar from the Light Matrix is connected to the Rishi identity and is able to run energy from Source, whereas the one from the Reverse Matrix cannot.
- (b) If you use up all the energy from the original pattern, the original Morphogenetic Field, without continual supply from Source, you will slowly lose the vibrational rate of the Morphogenetic Field, begin to fragment and fall apart till you go back into space dust.
- (c) The Reverse Matrix Avatars vampire energy off life-force fields of other Densities that still have a connection to Source.

Vocabulary

1. code convolution:

The Lyrans caused a condition called code convolution by combining too many of the same type codes in strange configurations. They started to mix & match consciousness, play with the codes & see what else they could come up with as far as creating new versions of themselves. At a certain point, if you mess with the original consciousness too much, it becomes something different from what it was originally.

It breaks down connection on the Avatar Level at HU-4, and the Rishi Level at HU-5. The Reverse Matrix Avatars decided to sever their Rishi connection because the Rishis were trying to direct them to get back into harmonization, and they took that as taking away their free will. So they made a choice to sever themselves. It caused a lot of distortions of those races that were created from those matrices of consciousness.

In HU-3, some members of a race of etheric beings who became distorted due to the code convolution of the harmonic levels above them began to develop characteristics that here we will be very familiar with, like warring consciousness, things like one consciousness trying to dominate another. They lost touch with the oneness and the fact that we are all the same and when we get to that level we are all God. They got into mentalities that

even now we are still trying to purge from our own consciousness. They began to work against each other.

Certain groups in HU-4—these are the Christed beings that are liquid light—became very aggressive toward other groups, and they were not responsive towards working with the Law of One. They decided purposefully and willingly that they didn't want to play by whatever rules were being set by the whole.

2. Finite Identity:

When the Avatars at HU-4 and the races that manifested from it made that choice to sever their connection to their Rishi Identity in HU-5, they became Finite Identities. They had within them the energies of the original pulse of consciousness, but when they severed (through Monadic reversal) the connection to the higher matrices, they severed the connection of perpetual energy being pulsed through them from Source. They are still existing within Source, but they just can't run energy from it anymore.

It causes a problem for them, because although they are independent and can do what they want, they are finite. If you use up all the energy from the original pattern, the original Morphogenetic Field, without the continual supply Source can give you, you will slowly lose the vibrational rate of the Morphogenetic Field—you begin to fragment and fall apart till you go back into space dust, i.e., undifferentiated units of consciousness.

So you still exist—you are still alive as consciousness, but your units of consciousness are no longer aware of their ascension identity—they can no longer experience being evolved, the at-one-ment of being in power. They are simply units of consciousness that can be used by other forms for their evolution. So those races knew that they created a dilemma—finally free, but also going to lose themselves.

They had a choice—they will always have a choice to put the Monad where it belonged—put the codes back. They didn't want to do that—instead they found a way to feed themselves. They found a way to drain energy from the life-force fields of other Densities that still have a connection to Source. If they can't get the connection directly, they have to vampire off other energy fields. We are not talking about little guys here, little ETs—we are talking about huge fields of consciousness that are equivalent to what we imagine are Christed consciousness.

3. God Seed:

There are 3 definitions of the God Seed in this DVD segment:

- (a) It is the original point of Creation.
- (b) It is the original point of All That Is.
- (c) It is the Home of the Heart and Mind of God.

The God Seed exists in Eternal Time, which is beyond the Time Matrix where all is known and never forgotten. It is gestalt consciousness, from which infinite members of our family of consciousness are created.

To access the God Seed, visualize a tube/beam of light from the 7th chakra to the **D8 portal** at the core of the planet **Mintaka** within the **Orion Star System**. This portal allows consciousness to move back & forth and in & out of the Time Matrix.

The **God Seed energy** spins like a strand of DNA. It is a double helix type of spin with energy currents coming down clockwise & counter-clockwise at the same time, spiraling into the spark of light encapsulating the shadow of light at the coccyx. The God Seed energy recognizes the spark of light but not the shadow, which is the original reversed Karmic Imprint at the point of entry to HU-1 here. The God Seed energy then merges with that spark of light, making it bigger and stronger, while the shadow of light there comes apart and is transmuted back into the light because the frequency is too high to sustain it.

Once the shadow is transmuted, it begins the natural releasing process of energies that are multi-dimensional in nature. When we start to call alive the codes of the God Seed within us, we will start to activate within the Crystal body, the Morphogenetic Field, the karmic pattern that will bring into our line of experience other members of our family of consciousness that came in on the same pulse of consciousness as us. Humans came in on exactly the same pulse. Our family link is established when we re-twist our pulse of consciousness with the codes of the God Seed. This energy will begin to heal the Hova Bodies so that they will begin to merge over time.

Opening the lines of communication through the energies of the God Seed is a way of protecting ourselves from distortions that make that energy run away.

4. Illuminati:

The **Illuminati** are basically beings who have undergone complete Monadic reversal; some of them for so long that they have no cellular memory at all of what it means to be at one with Source. They exist from HU-1 all the way up to HU-4.

The Illuminati Matrices evolved a long time before the Human Imprint was created or before the human race was created to rectify some problems the Illuminati caused. Once upon a time there were pulses of consciousness that came in together & they were all consciousness—they were all pulses of light. There were no Illuminati at that point in our matrix.

5. Karmic Imprint:

When the process of forming dark crystals that vibrate at a totally opposite polarity in the Morphogenetic Field is compounded, it forms the Karmic Imprint. This miasmatic build-up of dark crystals blocks anything coming through from the higher levels. Instead of being able to bring the light in to clear those crystals, the Karmic Imprint progressively brought more of those dark crystals in at a faster rate than the light coming in. The Karmic Imprint blocks the light coming in from the higher levels; we get denser, our consciousness moves slower, and we end up in HU-1.

At the coccyx is a spark of light encapsulating a smaller shadow of light. This shadow represents the original reversed Karmic Imprint of the body at its point of entry into HU-1 reality here. Most of us have many incarnations at this time and many karmic patterns

compounded on this one. This one shadow is one that is following us throughout our lifetimes, and we can use the God Seed energy to remove it, to turn it back into life.

The GA believes in using specific energy dynamics to clear the Karmic Imprint as the priority for survival, rather than having to walk through our karma, which is too time-consuming. We can always catch up with the lessons later.

To clear the Karmic Imprint of miasmatic grids, we can find 1 or 2 key core elements of the Morphogenetic Field that we want to flip, reverse that polarity at its point of origin and put the whole bunch of them in line with the Heroic Probability of the Soul's intentional path. That will erase thousands of years of karma accreted in this cycle. We can choose to clear ourselves in one big bang, blow ourselves right out of matter & completely into full cognition, or take it a little slower so that we can remember the process.

6. Kee-Ra-ShA:

The kundalini or energy spirals of light that activate at the coccyx begin access to the original point of entry into HU-1, thereby setting into motion within the Morphogenetic Field the resonance that will draw you & your family of consciousness together for your next step of evolution. It will begin the process of your homecoming & your gestalt consciousness coming back together to become the God Seed again.

The spirals at the coccyx connect to the multiple Levels of Identity of one through the cosmos. They are the cosmic strands of energy. In most people the Kee-Ra-ShA are dormant. Only a small amount is necessary to sustain the physical form here.

You don't want to wake up your Kee-Ra-ShA spirals all at one time, for you can surprise yourself how fast you can expand back into the God Seed, and you can possibly throw yourself out of existence and scare the people around you.

7. Kristos:

The light matrix of HU-4, our liquid light collective consciousness, is called the Kristos. In this matrix, you have the Christed Avatars—they create Oversouls, sets of them, families of them. The Oversouls create families of Souls. The Souls create families of Incarnates down here, family lines, genetic lines. They run directly into the Christed matrices.

The matrix with its reversed polarity at HU-4, the **anti-Kristos**, and the members of that collective would be representatives of the anti-Christ just as members of the Light Matrix would be members of the Christ. There are Avatars without intact Monads who still have the ability to create through their thought forms, to create using codes of the lower dimensional aspects of themselves. There are people here born through those matrices who have the codes of the Reverse Matrix Avatars. That doesn't mean that they are bad people. Even if they are part of those matrices, it's OK, because all they need to do is to make a Rishi connection. That's the problem with that matrix—it has severed that connection between the Avatar and Rishi Levels of Identity.

8. Love:

Love is a state of vibrational harmonization. The meditation establishes a state of harmonization of our consciousness with the original point of Creation, the God Seed. We feel in our body the love and frequency from the God Seed as it begins to travel down our Pillar of Light into our physical body.

9. Lyrans:

The **Lyrans** were some of the original groups that came in from the Cradle of Lyra. There are about 24 different families, each from the 24 different God Seeds. They went through the Lyran pattern, so there were 24 basic families of consciousness that manifested as **Lyrans**. Some of the **Lyrans** caused code convolution when they started to experiment, mix and match consciousness and play with codes.

10. Monad:

The **Monad** and the **Monadic Imprint** are the key to leaving the Time Matrix at D8. They are the key to being able to achieve ascended mastery in the expansion back into God Source. In the meditation, the Monad is a silver-blue area of the Energy Matrix, the final place you have to move through until you get into the God Seed.

11. Monadic reversal:

You can conceptualize a **Monadic reversal** this way: If you had your monad as a sphere of energy, and in that sphere of energy there are little shapes, let's say, triangles and square things—they were pointing at one direction, and that was the direction that kept the electromagnetics intact in the Morphogenetic Field. To reverse the **Monadic Imprint** would be to flip them over, create the mirror image, which will reverse the polarity of their charge.

What the **Monadic reversal** does to the consciousness that is still in the Time Matrix is that it severs it from the Pillar of Light that connects you all the way up. It is created so that the lower Hova Bodies of the Time Matrix cannot plug into the higher ones of ascended mastery, which keeps you locked in time.

If **Monadic reversal** happens here, not only will the Earth incarnate here be locked in its own Time Zone in HU-1, all the higher aspects of identity will be phase-locked into the dimensions. You get stuck where your Hova Bodies can't integrate.

If there is enough **Monadic reversal** in people, it will affect the Earth's grids directly—we will create distortions in the Earth's Morphogenetic Hova Bodies where they won't be able to integrate to create the ascension cycle. During the ascension cycle, the Earth is temporarily moving into integration of its multidimensional Hova Bodies. If once the process has started something blocks that, it creates instability within the grids.

If our physical body has very bad miasmatic programs in there because the Hova Bodies don't integrate, it will make the electrical energy coming in from the higher body fragment all over the place, which will result in disease or distress in the physical system. In the Earth body, it will do the same. It will create a condition of tectonic stress, and if the tectonic stress is too bad it will create Earth changes that we don't want to see and we don't have to see.

12. space dust:

Space dust is undifferentiated units of consciousness that can be used by other forms for their evolution.

Multiple Choice

- 1. How is the Karmic Imprint created? It is the result of ____.**
 - (a) the combination of too many similar codes
 - (b) the build-up of dark crystals in the Monad only and nowhere else
 - (c) the build-up of dark crystals in various portions of the Morphogenetic Field
 - (d) too many codes in the Morphogenetic Field
- 2. To get the Karmic Imprint out of the body, the GA uses energy dynamics to ____.**
 - (a) accelerate the pace of lessons the Soul needs to learn
 - (b) reverse the polarity of key elements in the miasmatic grids
 - (c) align its point of origin with the Soul's Heroic Probability
 - (d) begin the process of releasing multidimensional energies
- 3. To get through the D8 portal, we visualize a tube of light from the 7th chakra to the ____.**
 - (a) Time Matrix
 - (b) Energy Matrix
 - (c) Cradle of Lyra
 - (d) core of Mintaka
- 4. How can the original reversed Karmic Imprint be transmuted into the light? It can be transmuted by ____.**
 - (a) directing the God Seed energy to the coccyx.
 - (b) activating the God Seed energy at the coccyx
 - (c) directing the Kee-Ra-ShA spirals to the coccyx
 - (d) activating the Kee-Ra-ShA spirals at the coccyx
- 5. What is the route taken during the forward journey to the God Seed?**
 - (a) D8 portal → Monad → Energy Matrix → God Seed.
 - (b) D8 portal → Energy Matrix → Monad → God Seed.
 - (c) Energy Matrix → D8 portal → Monad → God Seed.
 - (d) Energy Matrix → Monad → D8 portal → God Seed.
- 6. What is the route taken during the "side-trip" of the return journey from the God Seed?**
 - (a) D15 → HU-4 → D8 → HU-1.
 - (b) HU-4 → D15 → D8 → HU-1.
 - (c) D8 → HU-4 → D15 → HU-1.
 - (d) D8 → D15 → HU-4 → HU-1.

- 7. What are the colors experienced in the Monad and HU-4 respectively during the meditation?**
- (a) Monad: gold and blue; HU-4: silver and gold.
 - (b) Monad: gold and silver; HU-4: gold and blue.
 - (c) Monad: silver and blue; HU-4: silver and gold.
 - (d) Monad: silver and gold; HU-4: silver and blue.
- 8. Which of the following statements is true about all members of the Illuminati?**
- (a) They reside in HU-1 only.
 - (b) They reside in HU-1, HU-3 and HU-4 only.
 - (c) They have all been experimenting with codes.
 - (d) They have all undergone complete Monadic reversal.
- 9. What causes code convolution? It is caused by the ____.**
- (a) strange configuration of numerous similar codes
 - (b) strange configuration of numerous different codes
 - (c) polarity reversal of codes in the Morphogenetic Field
 - (d) electromagnetic instability of codes in the Morphogenetic Field
- 10. Code convolution has led to the genetic distortion of some of the ____.**
- (a) Lyrans only
 - (b) Lyrans and etheric races only
 - (c) beings residing in HU-4 and HU-5 only
 - (d) beings residing in HU-1 through HU-4 only
- 11. What is space dust defined as in Keylontic Science? It is defined as ____.**
- (a) a finite form with free will
 - (b) differentiated units of consciousness
 - (c) undifferentiated units of consciousness
 - (d) a finite form that feeds off other energy fields
- 12. A Reverse Matrix Avatar is unwilling to ____.**
- (a) shapeshift
 - (b) create Oversouls
 - (c) make a Rishi connection
 - (d) integrate his lower Hova Bodies
