Questions and Answers

- 1. What does “the Cosmic Clock is going to be reset” mean?**
 - It means that the Merkaba alignments of the grids all the way up are going to be reset with the natural divine time pulses and rotational spins that come down from the Eckasha-Aah.
- 2. What impact does the 23.5 degree misalignment of the planetary axis have on the beings on this planet?**
 - The misalignment shifts the angle of the planetary Merkaba, which shifts the angle of the Merkabas of everything on this planet, which prevents reception of the solar frequencies in the way that would be natural if the alignments were completely vertical.
- 3. What kind of a connection is there between the shields and the Merkabas?**
 - The shields spin with the Merkabas..
- 4. What are the proper ratios of the spinning Merkaba vortices?**
 - The proper ratio is 33 1/3 clockwise (electrical) for the top spiral and 11 2/3 counterclockwise (magnetic) for the bottom spiral.
- 5. Why is it important to get the right shape of the Kathara Grid? What happens if the proportions in the Kathara Grid are changed?**
 - Changing proportions in the Kathara Grid changes angles in the Merkaba.
- 6. Where does the Kristos Seed Atom live?**
 - In the AzurA.
- 7. What is the importance of having the Light and Sound Field spheres, like the Trion and Meajhe fields, around us?**
 - If we didn't have these Light and Sound Field spheres around us we would not be able to see the 3-dimensional hologram.
- 8. Why is it important to pay attention to our thoughts?**
 - Our thoughts, our ideas, our perceptions, our shields, are like pieces of film. When the energy of the Primal Life Force Currents and our consciousness move

through them, those imprints, those templates are holographically projected outward. We manifest our hologram as we go.

9. Why aren't we always able to manifest whatever we want?

- The reason we don't have direct manifestation of what we want is because the twists in the template, in the Merkaba fields, create Radial Body distortions. There are static fields in between the layers of the Radial Body that don't belong there. They are like an electromagnetic harness that blocks one layer of consciousness from communicating with another layer of consciousness, and they twist and distort and partially reverse intentions that are being sent through as an energy signature, so we get half or one-third of what we want, and two-thirds of what we didn't want.

10. What is the relationship between Merkabas and time?

- In addition to being the breathing system and the circulatory system of manifest creation, Merkabas are also time keepers. They literally set the pulse of time, and if the pulse of the Merkaba or spin of the Merkaba changes, it changes the pulse of time.

11. How is time an illusion?

- Time is the experience of energy fields within a certain pulsation of Partiki phasing; a certain combination of 3-dimensional Partiki phasing.

12. What is it that the Tri-Veca can do that the Bi-Veca can't ?

- A Tri-Veca creates light; a Bi-Veca cannot do that.

Vocabulary

1. Differential field:

The amount of energy that is available for manifestation at any given time within the shield.

2. AzurA:

A point in the Kathara Grid that lies exactly between Kathara Centers 6 and 7. It is the center point of the whole Kathara Grid (all Kathara Grids). In the human body the AzurA is located in the base of the thymus.

3. Trion field:

A positively charged field that runs between Kathara Center 11 and 2. A Trion field consists of Trion units. Trion units are D-11 units that carry ManA. They are pre-light units.

4. Meajhe field:

A negatively charged field that consists of D-10 units. They are pre-sound units.

5. Radial Body structure:

Spheres within spheres, the structure on which literally planets (and all beings) are formed.

6. Reion field:

A neutrally charged field that consists of D-12 units.

7. Tri-Veca Merkaba:

A Merkaba that can go both horizontally, vertically and diagonally.
