## Questions and Answers

- 1. What do we all have in common?**
  - Every person as an individual identity has an original point of origin, the point of separation and individuation from the eternal force, or God.
- 2. Where can we find the point of individuation?**
  - This point of individuation exists beyond the contours of space, time and matter and dimensional structure, beyond the system of the Time Matrix.
- 3. What is the purpose of geomancies and fire letters?**
  - Geomancies and fire letters are the building blocks the God mind uses as its processes of creation.
- 4. How can the stream of consciousness be viewed?**
  - The stream of consciousness can be viewed as a fixed beam of light-sound energy, composed of geomancies, fire letters and standing scalar waves, through which the creative pulse of the God mind perpetually spirals its consciousness into individuation in manifest form.
- 5. What does Stair Step Creation look like?**
  - The process of Stair Step Creation can be viewed as the singular beam of light and sound—a stream of consciousness—holographically refracting within the scalar fields of the Time Matrix, splitting itself into multiple beams, each imbued with portions of those qualities, attributes, fire letters and consciousness retained within the original beam or stream of consciousness.
- 6. How are the blueprints, or morphogenetic fields for conscious life forms, created in time?**
  - Each new beam of light-sound consciousness that is formed through the splitting of the original stream of consciousness retains part of the fire letter scalar wave design of the original stream of consciousness and creates new, smaller streams of consciousness that manifest as further differentiated individuated identities in manifest forms. Through this process of scalar wave splitting and refraction, the blueprints, or morphogenetic fields, for conscious life forms are created in time.

- 7. Can you say something about the morphogenetic field regarding humans?**
- In relation to the human form, which itself exists as a multidimensional scalar wave construction, a living morphogenetic field, the structure of dimensionalized consciousness takes the form of the 15-dimensional identity: the Rishi of dimensions 15 through 13, the Avatar of dimensions 12 through 10, the Oversoul of dimensions 9 through 7, the Soul of dimensions 6 through 4, and the Incarnate of dimensions 3 through 1. Each level of this multidimensional identity represents a progressively individuated fragment of the original stream of consciousness.
- 8. How does evolution happen?**
- The reality of evolution is the process by which the smallest fragments of individuated identity, those that have spiralled into the dimensionalized systems of the Time Matrix, progressively remerge with their original parts. Through this reintegration of identity the individuated consciousness progressively expands back into its original wholeness, rebuilding the original stream of consciousness upon which it entered dimensionalization. This is achieved by reassembling the fire letter scalar wave patterns of the original seed of consciousness.
- 9. When do we talk about ascended mastery?**
- When the original identity has been reassembled, the sentient consciousness that expands beyond the Time Matrix, returning to its original form as the sentient seed of consciousness, exists in co-creative atonement with the God source. This state of being is known as ascended mastery.
- 10. What is said about ascension in this lecture?**
- The clear-cut path of evolution is simply the rebuilding of the original fire letter scalar wave design of the original seed and stream of consciousness. Through this process the consciousness traverses backward, spiralling through the original beam of light-sound upon which it entered dimensionalization, then re-expanding into its original form of the seed of consciousness. This clear-cut evolutionary path, which is the product of Stair Step Creation, is known as the Path of Grace, the Path of the Middle Pillar, the Path of the Law of One. It is the path of ascension.
- 11. Why doesn't the universe expand itself out of balance?**
- The processes of creation and evolution are eternal. The experience of each manifest expression adds to and expands the overall content of the whole—God source—yet at the same time the original pattern of the whole remains indelibly eternally intact. The eternal force, the heart mind of God, is an unquantifiable construct of energy, consciousness, cognition and identity—pure sentient creative force. Though this force perpetually expands through new manifestations of itself, it too remains perpetually the same, for the perpetual expansion of creation is balanced eternally by a reciprocal contraction—the eternal stillness, the great void. The force contains within itself, as a natural attribute of its being, a balance between the stillness and the motion, expansion and contraction, order and chaos, darkness and light, creation and the void within which creation takes place.

Together, these attributes represent the eternal state of Is-ness, without beginning or end, that is the Being-ness of God. Through this eternal being-ness the cosmos is kept in perpetual balance.

**12. With what kind of challenge might the human individual who wants to follow the path of ascension be confronted?**

- Through its experience in dimensionalized consciousness the identity frequently makes choices that result in the distortion of the fire letter scalar wave patterns through which it is connected to the original stream of consciousness. Distortion of an identity's original fire letter design, which manifests through the morphogenetic field and also within the genetic code of the identity's physical body, disables the identity's natural ability to reintegrate with the fire letter patterns of the original stream of consciousness. When this occurs, literal energetic breaks appear within the multidimensional identity structure, breaking the stream of consciousness that tethers the in-time identity to the seed of consciousness within the God mind. Luckily, humans possess the spark of the living flame (see vocabulary), through which they can start the process of reconnecting.

Electro-tonal units of consciousness.

**3. Seed of consciousness:**

The point of individuation, which retains the integrity of its design within the Yunasai.

**4. Stream of consciousness:**

A specific signature in energy, electro-tonal units of consciousness called Partiki, that retains the original design of the identity that was set within the seed of consciousness.

**5. Geomancies:**

Geomancies are composite groupings of fire letters.

**6. Fire letters:**

Fire letters are composite groupings of standing scalar wave patterns.

The part/aspect of the human consciousness that resides in dimensions 12, 11 and 10.

**10. Oversoul:**

The part/aspect of the human consciousness that resides in dimensions 6, 5 and 4.

**12. Spark of the Living Flame:**

Identities in the Time Matrix, regardless of the amount of distortions in their connection to the original stream of consciousness, possess at least one minute fragment of the original seed of consciousness, one fragment of the original fire letter scalar wave design, that originally connected them to God source. This fragment of the original seed is called the Spark of the Living Flame, and it contains within it the potential to regenerate the original fire letter design of the seed.
