Questions and Answers

- 1. A'sha talks about Hova Bodies. What are Hova Bodies?**
 - Hova Bodies are multidimensional grids of light and sound upon which the physical particle base of the body is manifest. They are scalar grids, interwoven networks of standing scalar wave patterns that emanate from fixed points of electro-tonal frequency, which serve as templates of consciousness for particle manifestation.
- 2. How many primary Hova Bodies are there and, collectively, what are they called?**
 - There are eight primary Hova Bodies; collectively, the eight Hova Bodies are referred to as the Morphogenetic Field.
- 3. Where do we find morphogenetic fields, and what is the substance that composes morphogenetic fields?**
 - The Morphogenetic Field is composed of crystalline micro-particle units of electro-tonal consciousness called partiki, partika, and particum. All manifest forms, including thoughts themselves, possess morphogenetic fields that exist within the greater morphogenetic fields of universal and cosmic structure.
- 4. How does A'sha define the Human Crystal Body?**
 - In terms of human anatomy, the eight Hova Bodies of the Morphogenetic Field are called the Human Crystal Body. The Human Crystal Body is the vehicle through which consciousness manifests itself into individuated identities in time.
- 5. What is the general rule for defining the perception of objects as solid when viewed from specific dimensional levels of perception?**
 - As a general rule, energy patterns or morphogenetic fields that are stationed within dimensional bands precisely one dimension below one's station of consciousness will be perceived as physically solid, manifest objects and events.
- 6. How is thought described?**
 - The thoughts you think are composed of ultra-micro particle units of consciousness. They represent many morphogenetic fields that become part of the literal energetic field and substance of the Crystal Body upon which your physical body and manifest reality pictures form. Thoughts are, indeed, things in energetic

terms, and quite powerful, for they are the creative substance out of which morphogenetic templates for matter manifestation are created.

7. When will you perceive your thought forms as manifest substance?

- When your consciousness has expanded to incorporate the frequency bands contained within the dimension above the one in which the thoughts are held.

8. Where do thoughts go once your attention has left them?

- Part of what appears to you as manifest reality now represents your thought forms and those of the collective masses that were left behind as morphogenetic fields when your conscious focus of attention was stationed in the dimension below your present state of focus.
- Part of what you see before your eyes represents the living thought forms of your past selves from this incarnation, and those of the previous incarnation, and those of the masses.
- Your thoughts become morphogenetic fields within your personal Crystal Body and within the morphogenetic Crystal Body of the Earth. Your thoughts are planted within the frequency bands in which your consciousness is presently stationed, left within your present time to be re-discovered as manifest objects and events once your consciousness has moved ahead in time and evolved beyond them.

9. What are miasms and what do they do?

- Miasms are thought forms from your past moments and incarnations that are composed of more dense, slower moving particles of lower frequency bands manifest within your Crystal Body and physical self.
- Miasms distort the natural flow of energy and identity through the Crystal Body and physical form, impeding the process of evolution. They are the morphogenetic imprint responsible for creating the manifestations of disease and disharmonic conditions within the body and life drama.
- Miasms affect the design and function of the DNA and body form itself, and operate as energetic blockages to the natural evolutionary process of Hova Body integration.
- Miasms from each life time are compounded, their patterns replicated in each life experience, creating a burdensome collection of ever growing miasms or karmic debt within the Crystal Body.

10. How did the original immortal human genetic code operate in its original 12-strand DNA form?

- In its original 12-strand DNA form, the Crystal Body progressively transmuted the miasmatic imprint as the identity evolved along in time through the integration of the Hova Bodies and higher dimensional identity levels. Through the process of embodying the higher identity levels, disharmonic miasmatic thought crystallizations were easily transmuted and re-aligned through the energies of the higher dimensional levels or Hova Bodies. The Earthly identity was able to

evolve in time with less matter density, free from Karmic Imprint of ever-increasing miasmatic build up within the Crystal Body.

11. Compare the traditional manner of processing karma with that of consciously working to dissolve miasmatic karmic crystallizations within the Crystal Body.

- Processing karma in the traditional manner by walking through disharmonic patterns in objectified manifestation is slowly accomplished and is the hard way to learn to clear the Crystal Body and align the Earthly identity with the higher identity levels.
- If it can be understood that karma is nothing more than a build up of slower vibrating disharmonic miasmatic crystallizations within the morphogenetic Crystal Body, this burden can be dealt with in its true form, as energy, with energy. Working directly with the frequencies of the higher dimensional Hova Body identities, the Earthly consciousness can clear, transmute, or burn off much of its karmic imprint by directing specific frequency patterns directly into the miasmatic crystallizations. The miasmatic crystals of the morphogenetic Crystal Body that make up the Karmic Imprint can be shattered and their energies re-aligned through direct application of higher dimension frequency.

12. What is dimensional ascension?

- Dimensional ascension or vertical evolution is the result of consciousness expanding throughout the dimensional scale through progressive harmonic integration of the morphogenetic Hova Bodies within which the dimensionalized levels of consciousness are stationed. Vertical evolution toward At-One-Ment with Source is the birthright of every human, and represents the original morphogenetic program upon which the human being, the human Crystal Body, and human consciousness were designed.

Vocabulary

1. Hova Bodies:

Multidimensional grids of light and sound upon which the physical particle base of the body is manifest. They exist as scalar grids, interwoven networks of standing wave patterns that emanate from fixed points of electro-tonal energy, which serve as templates of consciousness for particle manifestation.

2. Morphogenetic fields:

Are the form-holding templates of consciousness through which matter forms and events manifest.

3. Partiki, partika, particum:

Crystalline micro-particles of electro-tonal consciousness.

4. Crystal Body:

Collectively, the eight Hova Bodies of the Morphogenetic Field are called the Human Crystal Body. It is the vehicle through which consciousness manifests itself into individuated identities in time.

5. Miasms:

Are lower vibrating, disharmonic past thought forms that become trapped within the Crystal Body and physical self. They are the morphogenetic imprint responsible for creating the manifestations of disease and disharmonic conditions within the body and life drama.

6. Karmic Debt or Karmic Imprint:

The collective body of lower vibrating miasms carried within the Crystal Body.

7. Heroic probability:

Harmonious path of evolution. It is the original morphogenetic Crystal Body design through which progressive and unimpeded integration of Hova Body identities occurs.
